SENTER FOR ENFRANCHISE-

We publish this morning a special dispatch from Nashville reporting the fact that SENTER, in a speech at the STOKES meeting, held yesterday, anounced himself in favor of the enfranchisement of every citizen in Tenessee. He was bitterly personal upon STOKES, thus setting at rest any doubts that he would continue the race. The issue is definitely made up. SENTER, the Republican, opposes STOKES, the Radical.

CHINESE LABORERS.

We present below an interesting and instructive letter from CILAS, W. LIGHTNER, Esq., a distinguished Mining Engineer, of California, addressed to a friend in this city. We call attention to that portion of it in which he remarks that "the six companys are able to turn Chinese out by the thousand." The question occurs to us can these " six companies" -which are wealthy Chinese corporations-be induced to locate at one or more of our scaport cities, or in Memphis, as a base of operations for the South? New Orleans is but eighteen days farther from Canton than San Francisco, The idea of Chinese immigration is beginning to take a tangible form, and we trust that some move will be made in the matter before it is too late for next season. Will the seaports repond? Will the rice-growers and sugar planters give this scheme the earest consideration it deserves? It will be noticed that Mr. LIGHTNER had but one foreman to seventy-five or one hundred hands, and found them faithful, reliable and efficient. What if all the plantations in the South were manued by such people: For such laborers as are here described no canvassing would me required; five hundred thou-

We will remember, with pleasure, the kind-ness and friendship of the people with whom we became acquainted, particuhe unskilled labor is concerned, and this the unskilled labor is concerned, and this will be all the argument that is necessary to show that it is the best that is available. With this fact before the people of your district, it would be well for them to send whom we became acquainted, particu-larly yourself and family, and hope some time to be able to reciprocate. A visit of that kind among the Southern people dis-sipates many prejudices, and affords a much more correct knowlodge of the real situation and feeling of the people than is possible to obtain from the people either North or South. We will do what little may be in our power toward correcting a party here who would thoroughly investigate the subject, and with power to arrange for the introduction of this labor into your cotton and sugar plantations. I have no doubt that in time it will work wonders for your section and if carried may be in our power toward correcting wrong impressions and turning the atten-tion of those contemplating a change of wonders for your section, and if carried out on a large enough scale, will restore the South to its old position as a commer-cial and producing country.
